Senate Bill 1084 (as reported without amendment)
Sponsor: Senator Dale W. Zorn
Committee: Transportation

CONTENT

The bill would amend the Michigan Vehicle Code to delete a requirement that an emergency vehicle's flashing, rotating, or oscillating red lights be mounted on the roof of the vehicle.

Under the Code, the use or possession of flashing, oscillating, or rotating lights of any color is prohibited except as otherwise provided by law, or under certain circumstances. Under one of those circumstances, an "authorized emergency vehicle" may be equipped with flashing, rotating, or oscillating red lights for use when responding to an emergency call if, when in use, the lights are mounted on the roof section of the vehicle, either as a permanent installation or by means of suction cups or magnets and are clearly visible in a 360-degree arc from a distance of 500 feet when in use. The bill would delete the requirement that the lights be mounted on the roof but would retain the visibility requirement.

A person who operates lights under this provision except when responding to an emergency call is guilty of a misdemeanor.

MCL 257.698

Legislative Analyst: Drew Krogulecki

FISCAL IMPACT

The bill would have no fiscal impact on the State and would have an indeterminate, though minimal, fiscal impact on local government. Removing the requirement that lights be mounted on the roof of an emergency vehicle theoretically would reduce the number of violations. It is unknown whether those violations would occur in the absence of the bill. A decrease in misdemeanor arrests and prosecutions could reduce resource demands on law enforcement, court systems, and jails. Any decreased fine revenue would reduce revenue dedicated to public libraries.
